Joomla!

Congratulations! You have a Joomla site! Joomla makes it easy to build a website just the way you want it and keep it simple to update and maintain.

Joomla is a flexible and powerful platform, whether you are building a small site for yourself or a huge site with hundreds of thousands of visitors. Joomla is open source, which means you can make it work just the way you want it to.

Beginners

If this is your first Joomla! site or your first web site, you have come to the right place. Joomla will help you get your website up and running quickly and easily.

Start off using your site by logging in using the administrator account you created when you installed Joomla.

[Read more: Beginners](#)

Upgraders

If you are an experienced Joomla! 1.5 user, this Joomla site will seem very familiar. There are new templates and improved user interfaces, but most functionality is the same. The biggest changes are improved access control (ACL) and nested categories. This release of Joomla has strong continuity with Joomla! 1.7 while adding enhancements.

[Read more: Upgraders](#)

Professionals

Joomla! 2.5 continues development of the Joomla Framework and CMS as a powerful and flexible way to bring your vision of the web to reality. With the administrator now fully MVC, the ability to control its look and the management of extensions is now complete.

MULTIBOX

The S5 Vertex Framework is a set of functionality that creates the core logic and structure of a template. The purpose of the S5 Vertex framework is to unify the layouts, designs, and functions that Shape5 has built over the years to create one of the most flexible, robust and powerful template blue prints available!

Some of the great features of S5 Vertex include: Fixed or Fluid layouts, custom page, row and column widths, an average of 80 module positions giving you an almost unlimited amount of layouts including up to 5 columns, S5 Flex Menu, mobile device support, integrated multibox and tooltips, third party component styling, google font integration, SEO optimized layout, RTL language support, and so much more! The functionality of the S5 Vertex Framework is endless. Seize the power of this great framework today for your site! [Read more...](#)

Custom Page and Column Widths

Set the entire width of your site to either a fixed pixel width or a fluid percentage width. Additionally, you can set the width of the columns, body and rows to any size you need. [Read More...](#)

Hide The Main Article Area on Any page

The Shape 5 Vertex framework allows you to hide the main Joomla component and article output on any page of your site so that you are not forced to have an article shown. [Read More...](#)

Lazy Load Images Save on Bandwidth

The lazy load script delays the loading of images until they are present in the viewing area of the browser, which dramatically decreases page load time and saves bandwidth. [Read More...](#)

The screenshot shows the Joomla! administrator interface. At the top, there is a navigation bar with tabs: Site, Users, Menus, Content, Components, Extensions, and Help. Below this, a sidebar menu is open, showing options: Control Panel, My Profile, Global Configuration, Maintenance (highlighted), System Information, and Logout. A sub-menu is displayed for the Maintenance option, containing three items: Global Check-in (with a green checkmark icon and a mouse cursor pointing at it), Clear Cache (with a green trash icon), and Purge Expired Cache (with an orange trash icon). The main content area shows a grid of icons for various managers: Module Manager, Extension Manager, Language Manager, Global Configuration, Category Manager, and Media Manager.

The screenshot shows the Joomla! administrator interface. The top navigation bar includes tabs for Site, Users, Menus, Content, Components, Extensions, and Help. The 'Components' tab is active, displaying a list of installed components: Joomla! (with a sub-menu for Updates), Content Manager, Media Manager, Messages Manager, Newsfeeds, Archived, Search, and Social Services. The 'Content Manager' component is highlighted with a mouse cursor.

The screenshot shows the Windows File Explorer interface. The left sidebar displays a tree view of the file system, with the 'src' folder selected under the 'src' directory. The main pane shows a table of files and folders. The file 'src_image_0.0.0.0_src_0.kit' is highlighted. The table has columns for Name, Size, Type, Modified, and Device.

Name	Size	Type	Modified	Device
src_image_0.0.0.0_src_0.kit	103 KB	ZIP archive	2020/01/13 12:02	Get page 1 of 1
